Greetings Cayuse User Community,

This Saturday, February 10th, our Engineering team will be completing scheduled maintenance on the infrastructure that supports the Research Suite.

During this maintenance window, we will also be updating the branding on the landing page for customers who own Cayuse IRB but do not also own Cayuse SP. If your institution owns Cayuse IRB and Cayuse SP, your re-branding will happen during the next SP upgrade.

When: Saturday, February 10, 2017 from 8AM to 8PM Pacific Time (11AM – 11PM ET)

During the maintenance window, all parts of the Research Suite will be intermittently unavailable (including Cayuse 424, SP, and IRB), but all existing records will be preserved and no action will be necessary on the part of any end user. Please note, even if your application appears to be working, we strongly advise against attempting to enter data during the maintenance window.
The Support team will send out a notification when maintenance is complete. We appreciate your patience as we continue to improve your experience with the Research Suite! As always, a maintenance day is scheduled for the second Saturday of each month. If you need clarification on this month's maintenance or have any other questions, please call (503) 297-2108 x201 or open a ticket [here](#).

Your Research Suite Experts,
Desiree & Cayuse, LLC
