

December 18, 2020

To All Campus Researchers,

As is true for most of the campus, please note that the campus COVID-19 testing program will be open next Monday, Tuesday and Wednesday (December 21-23) and then close down for the Holidays, re-opening on Monday, January 4. There are many appointments still available for the days immediately prior to the closure and immediately upon re-opening if you wish to avail yourself of these testing opportunities.

Additionally, if you wish to take a test during the closure, there are several options in the local community (see below). Keep in mind that there may be a charge for some of these options.

If you test positive at an outside clinic over the break, please immediately contact the COVID-19 Response Team at [ucsb-covid19@ucsb.edu](mailto:ucsb-covid19@ucsb.edu). Include your name and a phone number where you can be contacted, as well as your department, and the date you were last on campus. A member of the COVID-19 Response Team will reach out to you within 24 hours. If you develop concerning symptoms, please contact your regular health care provider, or call 911 as appropriate.
